

WE ARE HIRING

## 02 FRONT-END DEVELOPERS

### **JOB DESCRIPTION:**

---

The Frontend engineer will work in our development team to:

- Develop new features or maintain existing features of our web application – an internal product
- Conduct testing to ensure the features are delivered with relatively few bugs/issues and within deadlines.
- Communicate with other teams for technical supports when necessary.
- Knowledge of Agile, Scrum.
- Work under the technical leadership of the Technical Architect and report to a Team Leader.

### **REQUIREMENT:**

---

- 1+ years experienced with ReactJS.
- Experience with one or more projects that utilize any of ReactJS.
- Thorough understanding of ReactJS and its core principles.
- Have experience of HTML/CSS3.
- Ensure the technical feasibility of UI/UX designs
- Familiar with code versioning tools such as Git, SVN,...
- Familiar with Docker would be a plus.
- Understand how applications interact with the systems and have experiences with modern software engineering practices and paradigms.
- Degree in Computer Science, Information Technology or equivalent
