## **ABOUT US**

Deliverree is a full service logistics marketplace powered by sophisticated mobile and web app technology that allows your business to book and manage ground transportation of goods, cargo, merchandize, and almost anything else.

Our marketplace connects businesses with qualified drivers of commercial vehicles to provide affordable and trustworthy service according to our high quality standards. Presently, Deliverree is serving businesses in Bangkok, Jakarta, and Manila with more urban locations coming soon.

## **OUR FOCUS**

Logistics and Ground Shipping, Transportation Service Marketplace, Mobile Application, and Disruptive Technologies.

## **WHO ARE WE LOOKING FOR?**

Rebels, internet believers, early adopters, product passionate and most importantly – people who thrive in a fun and dynamic culture.

## **Description of Job**

- Scope documentation, use cases, workflows, wireframes, design and product requirements and other materials as needed to support UX design and development.
- Work closely with Product Team, Design and Engineering to specify requirements, and ensure features are being implemented according to business expectations.
- Work with regional product and dev teams to define data & metrics to be measured.
- Analyze data to derive business insights.
- Collaborating with designers to make sure your features deliver business objectives while also meeting a high standard of usability across web and mobile apps.
- Ensure business needs and deadlines are met and manage stakeholders expectations through effective written and oral communications.
- Partner with scrum lead to manage resource support and asset creation for development needs, while identifying and mitigating design and development risks.
- Integrate usability studies, research, and market analysis into detailed product requirements and feature specs.

## Candidate Qualifications

- BA/BS degree, Fresh Graduates are welcome to apply.
- Interests in product management practices, feature prioritization, roadmap, business requirements, specifications and wireframing.
- Interests in web and mobile standards, UX principles, designs and usability.
- Interests in analysing data (business intelligence analyst is a plus).
- Interests in writing specifications (use cases) and wireframing.
- Accountable, “Can do and get things done” attitude, independent and resourceful
- Comfortable in a small, intense and high-growth startup environment.
- Excellent interpersonal and communication skills, very detailed oriented.
- Excellent communication spoken and written English

## WHY YOU'LL LOVE WORKING HERE

- An exciting opportunity to work with the fastest growing international logistics player.
- International environment where you can work and learn with coworkers from different southeast asian markets.
- Opportunities for onsite trip in our operating markets.
- Project Launch Bonus Package
- Loyalty Bonus Package
- 13th Month Salary
- Annual Health Checkup
- Attractive Healthcare Insurance Package
- 15 Days Paid Annual Leave
- Company Sponsorship for Personal Laptop
- Regular Team Social Events
- Cool Entertainment Area (Guitar, Video Games, ...)
- Free Office Lunch
- Free Late Dinner Menu
- Free Flow of Coffee and Drinks (Juice, Coke, Sprite, Red Bull)
- All Day Free Snack
