

Front-End Developer Internship - 6 Months

(Ho Chi Minh City – District 4)

We are looking for a passionate & high-energy Front-End Developer Internship to join our team in Ho Chi Minh City. This position will suit a student graduate or Junior Front-End Developer with a strong creative capability both conceptually and in the development process. The right candidate must have a strong knowledge of basic web programming techniques with an eye for design.

Reporting into the Technical Leader this role will see you take the responsibility for the front-end implementation of a wide portfolio of e-commerce sites including landing pages, microsites, WordPress websites as well as data visualisation projects. To be considered for this role, you will be a proven and driven front-end developer as well as having a good grasp of web design and implementation principals. Candidates must have a strong commercial awareness, be able to work as part of a team and be able to communicate at all levels as well across all functions.

What you'll do

- Take courses on Front-end languages and tools including HTML5, CSS, Bootstrap, Javascript, VueJS, ReactJS, Wordpress, and Prototyping tool
- Attend trainings to improve front-end development skills
- Be trained by a Senior developer with more experience
- Learn to work in scrum framework, estimating and planning work according to scrum principles
- Work on smaller tasks whilst being guided in business domain knowledge
- Learn and apply various techniques and tools in the front-end development
- Learn how to solve problems quickly and in an efficient way
- Be trained on how to perform testing for code prior to release
- Be trained on time management towards meeting deadlines

Requirements:

- Fresh graduate or 4th-year student (majoring in Computer Science, Information Systems, or related field)
- Minimum working hours: 40 hours/weeks.
- Minimum internship: 6 months
- Excellent verbal and written English communication skills
- Bold passion for IT software development, especially front-end development
- Good IT background, critical and logical thinking skills
- Commitment to excellence and self-improvement
- Must possess a general understanding of web browsers, web compatibility issues, and the internet.
- Knowledge of the latest web authoring tools is crucial.
- Familiar with front-end scripting languages such as HTML, CSS, JavaScript, Bootstrap (optional)

**What We Offer**

- Allowance is up to \$400
- A workplace with the high energy, flat hierarchy, positive attitude, and growth you would expect from a startup coupled with all of the security and benefits of an established company.
- Flexible working hours
- Free gym and swimming pool access
- Fun team building activities including annual company trip, parties and other benefits
- To work in a role that has a global scope for a company that has an international presence
- Opportunity to turn the internship into a full time position

How to apply
