CABLES • PLASTICS • TOOLING • METAL

Company Introduction

Established in the USA in 1995, Airspeed was founded to provide manufacturing supply chain solutions to major electronics OEMs. To meet our customers' demands worldwide, we have further located our manufacturing base throughout Asia to be closer to our customers' facilities.

Airspeed is now a multinational group manufacturing cables, wire harness, plastics and metal components. We provide turnkey solutions, bringing our customers' concepts into reality. Our headquarters are located in North Carolina, United States of America, along with our international offices, R&D and manufacturing plants in the United Kingdom, Hong Kong, China, Mexico and Vietnam.

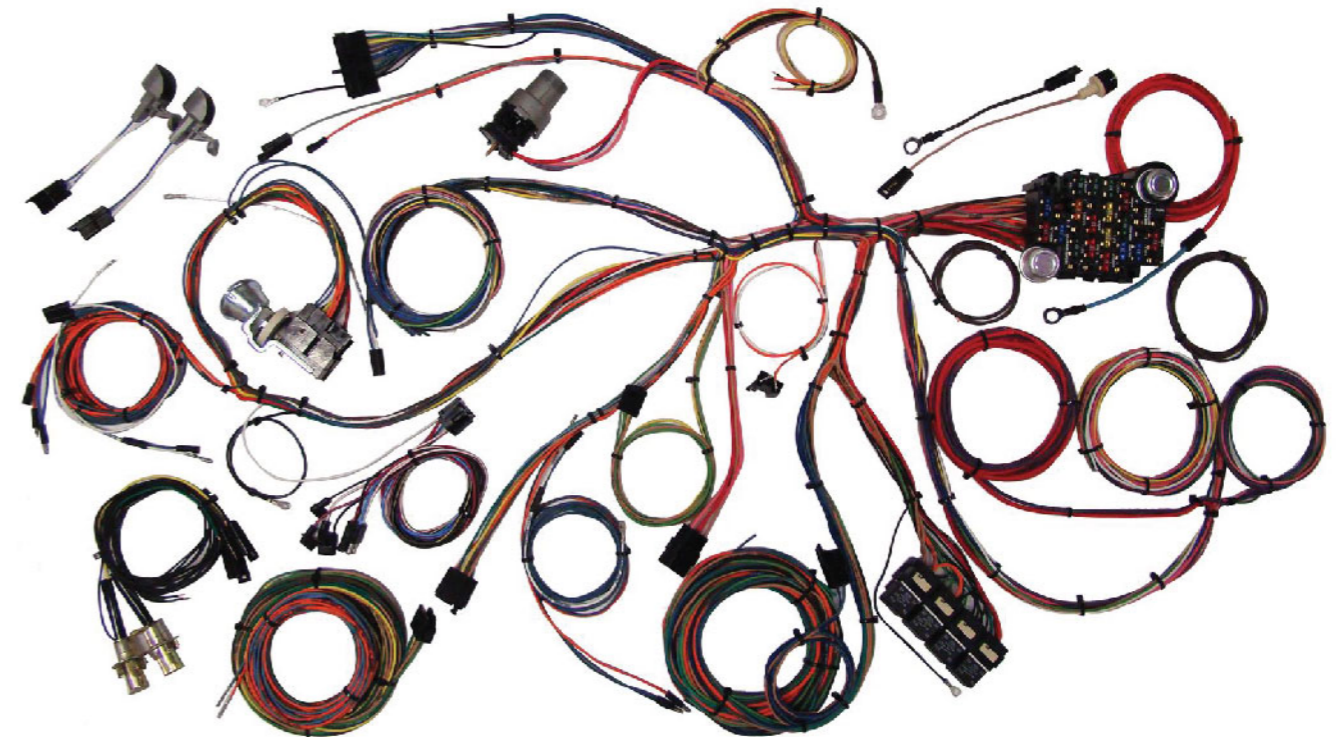

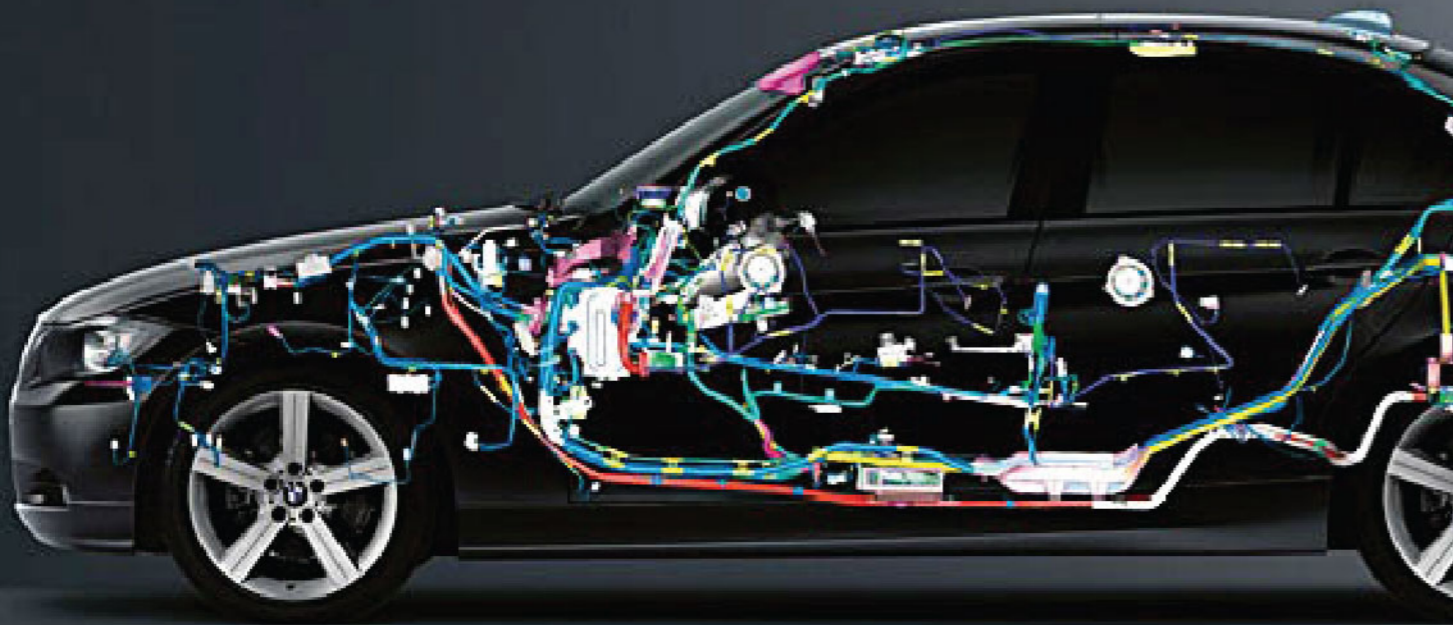

Airspeed Global Presence

Airspeed Group has more than 30 years of experience in producing cables, wire harness, plastic, metal components and sub-assembly to OEM and ODM customers. We provide complete manufacturing solutions from design, build, and logistics, serving customers in every major market channel, including electronic, telecom, lighting, automation and industrial sectors. A global footprint allows us to provide these solutions wherever you are.

Our leading products are known for their high quality and performance. As we work to meet our customers' needs now, we are constantly investing in research and development to provide solutions for the future.

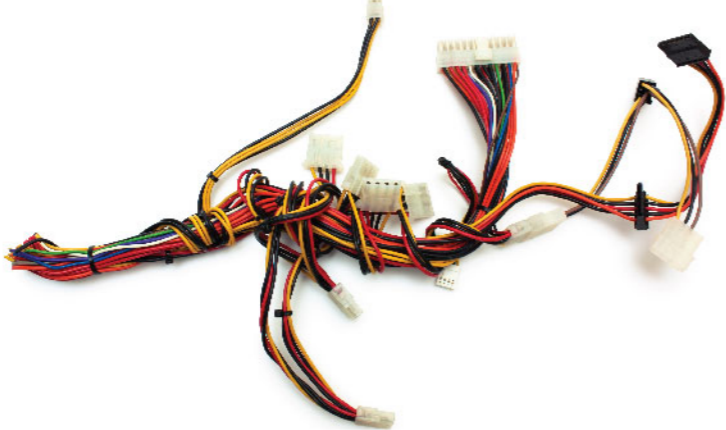

Airspeed Market Leadership in Diverse Sectors _____

- Information Technology
- Automotive
- Lighting
- Industrial Automation
- Home Entertainment
- Retail and Financial
- Consumer Electronics

Metal Stamping

Cable and Wire Expertise

For both customized design and standard product, we can help meet your cable needs for the most challenging environment and demanding applications. Our manufacturing technology and capability help ensure you get the right products on the right time and to the highest quality standards.

Active in Your Industry

Whatever industry or application, Airspeed can create quality components to suit your needs.

- Information technology
- High volume
- Quality and performance

Wire Harness and FFC Assemblies for Printer and Computer

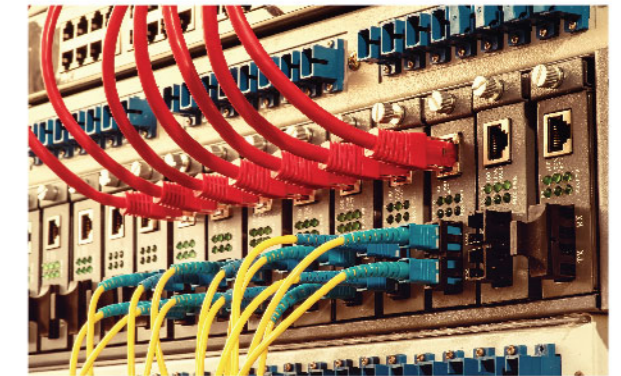

Automotive

TS16949 certified assembly for demanding applications from telematics to ICE

Retail and Finance

High mechanical and EMC performing cables for physical and data security

Industrial Automation

High quality cables for often tough environments where IP rating is required

Home Entertainment

High speed data transmission EMC and cosmetic requirements

Domestic Appliances

Complex high volume harness assemblies where safety is critical

Airspeed MFG has some of the finest cable manufacturing facilities in Asia, where focus is on high performance cables for a wide range of industries.

Our cable and wire capabilities include our extensive engineering experience in build to print and design solutions. All production plants are established to cater for both high volume and low volume production. We specialize in wire harness following IPC 620-A standard, overmold technology, automated termination and sub-assemblies.

We magnify the value of our products and technologies with expertise in supply chain solutions, technical support and customers services.

We partner with our customers to provide turnkey solutions and react to their requirements quickly. Our worldwide engineering and development resources coordinate with Asia facilities to provide real-time access to low-cost manufacturing. We strive to produce the highest quality product with a focus on best acquisition costs. Let Airspeed be your single point of contact for your manufacturing requirements, and benefits from our years of manufacturing experience.

Your Strategic Partner

Whether your business is electronics, home appliance, automation, industrial sector, or any applications, whatever cable solution you are looking for, you can put your trust in Airspeed. We can create quality cables to suit your needs and adapt your requirements quickly and effectively.

Our global presence means that we are always at your service. We can be your one-stop shop for a complete range of high performance component manufacturing.

What can we offer you?

Cables for electronics, lighting, medical, military and automotive industries are produced in our factories in Asia, which are ISO, UL and TUV accredited; as well as conforming to EICC-approved SER programs.

Our engineers who have many years of experience of mechanical parts design and manufacturing, follow a project from the first step to find out the best solution for our customers. We propose the optimal solutions, reducing both time and costs for you.

Our R&D departments in the US and Asia are equipped with modern and innovative technology. A design can be evaluated using various processing methods to provide options for the best cost-performance combination.

Certified Quality

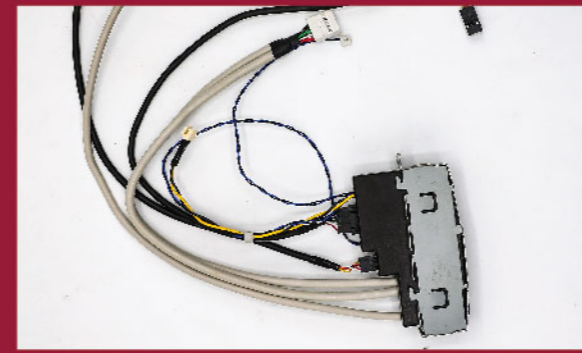

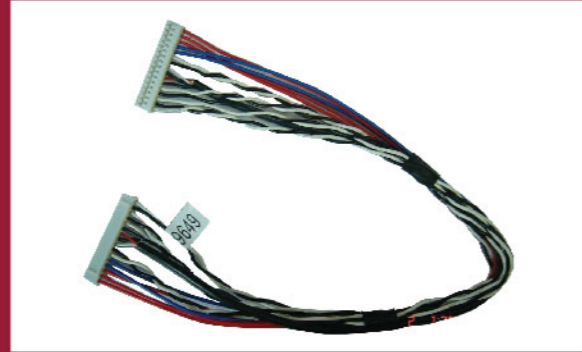

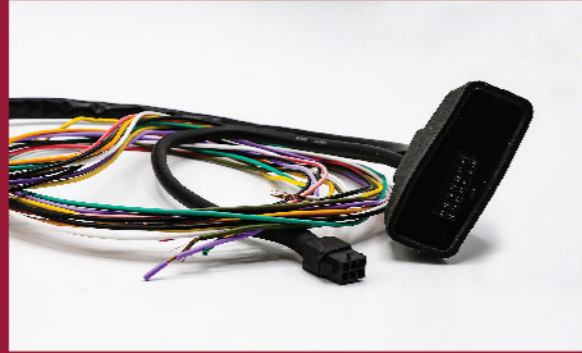

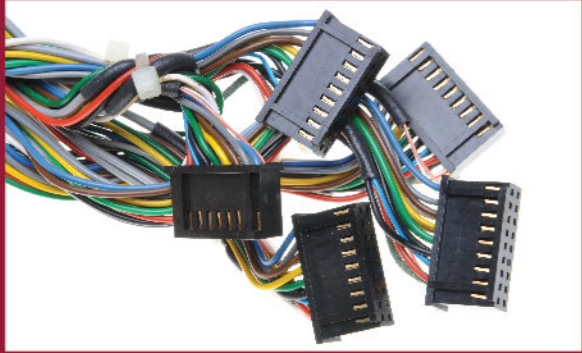

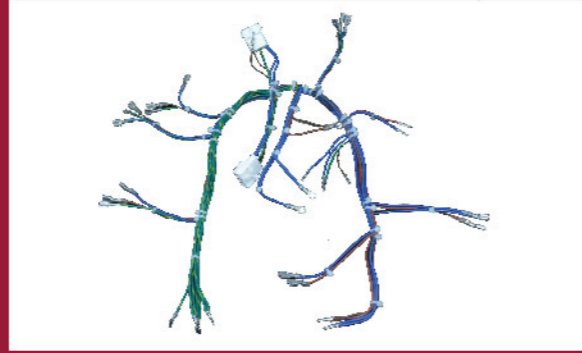

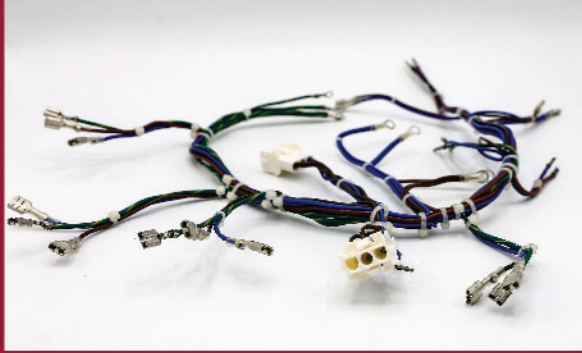

We guarantee the uncompromised quality of our products; all our cables conform to several internationally recognized standards.

Plastic and Metal Components

Metal and plastic components were the heart of Airspeed establishment and remains one of our core strengths. Our facilities have the most advanced equipment and technology for molding, die casting, stamping and spinning. We manufacture products using all grades of materials supported by our in-house tool production. Over 30 years of expertise specifically in plastics enables us to provide quality products at competitive prices.

Why Airspeed?

By partnering with Airspeed, you benefit from our commitment to local services, supported by our global presence. You can rely on our worldwide production and sales network to meet your needs quickly and effectively.
